Advanced Irrigation / Filtration Technologies

## Sets of Pot-Drippers for Outdoors use

Rain-Tal Ltd presents unique sets of **Multi-Outlet Pot-Dripper** made with 4 mm PVC micro-tubes and available from 2 to 6 outlets, 60 or 100 cm long. A modular design enables custom assembly of sets by "plug & play" Snap-in connectors for numerous applications such as, nurseries, gardens, greenhouses and even office and domestic window pots and flower pots.

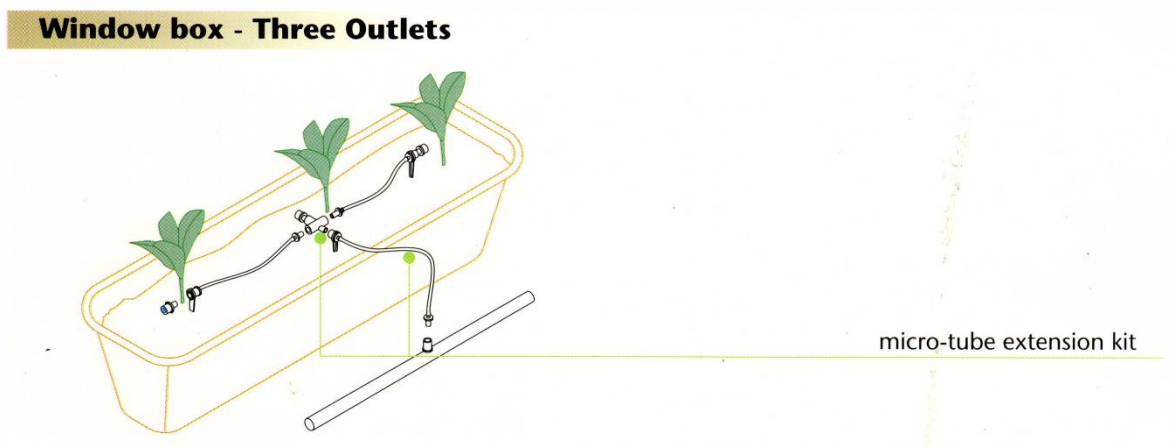

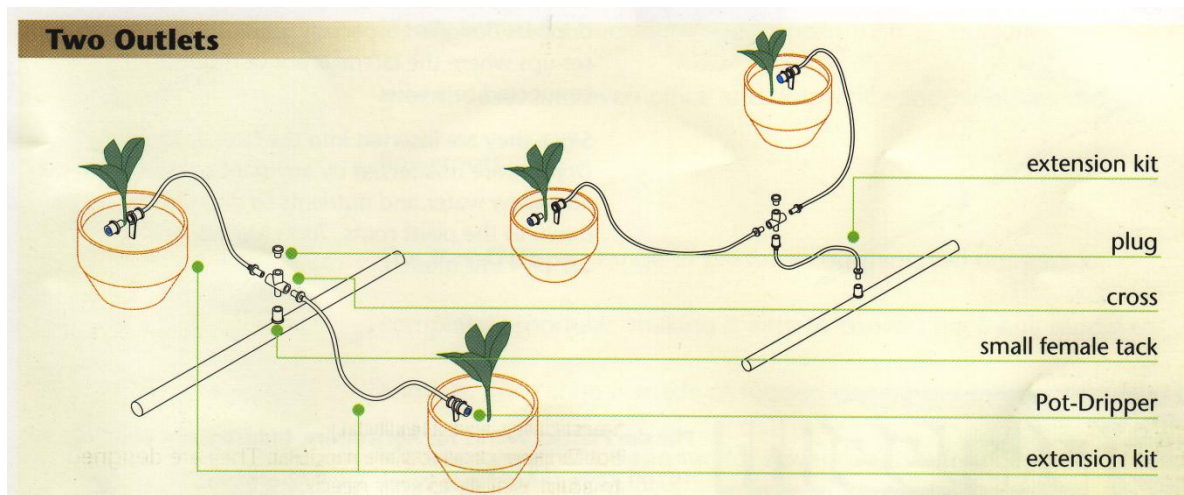

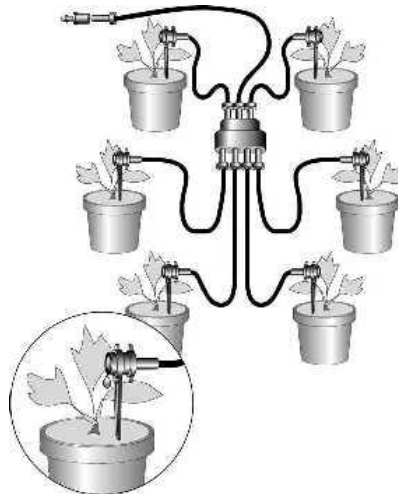

### The Features and Advantages of Rain-Tal Pot-Dripper Sets:

1. Each Pot-Dripper is located at the tip of a 4mm micro-tubing ensuring equal distribution of water and nutrients to each plant irrespective its location or distance from the central source.
2. Plug and play connectors enabling to unplug independent units when plants are sold or transferred.
3. The Pot-Drippers are available with discharges of 4L/hr, 2 L/hr.
4. Pot-Dripper sets come pre-assembled and are available in one, two, three, or six outlets.
5. An integral supporting mini-stick which permits accurate and positioning is included.
